

Platform

Software to power the new era of project finance.

Digital Project Finance in a box with everything you need to operate a best-in-class organization.

Centralize your data, unlock new insights, and protect it with the highest security standards

Easily scale with a flexible, configurable platform

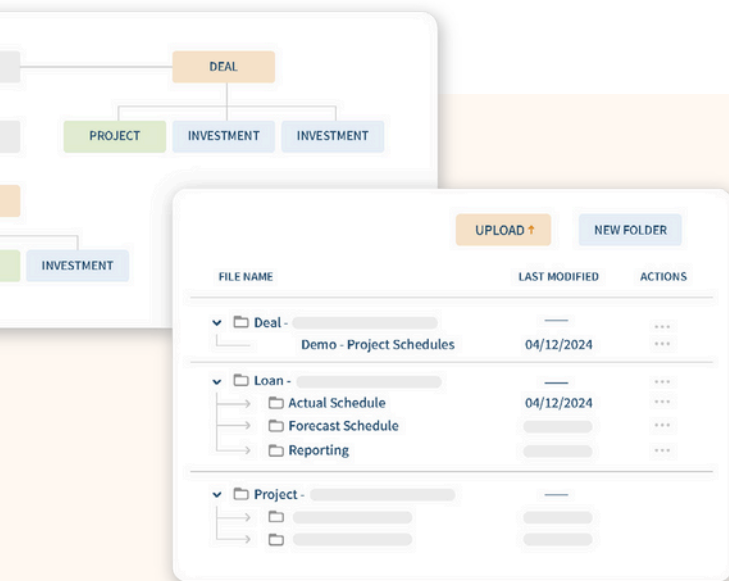

Protect your data with the highest security standards

Manage your **end-to-end project finance** process under one platform

Empower your team to focus on the most strategic initiatives

Flexible and Configurable Setup

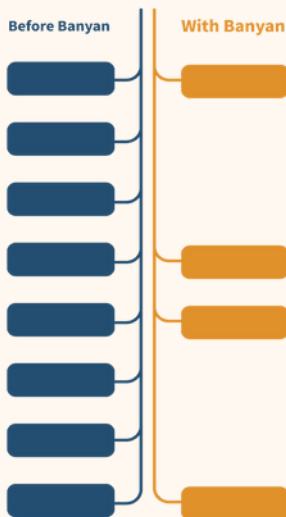

Configure the platform for your operations.

- Accommodate all deals and structures.
- Augment your company's unique intellectual property with best practices.
- Flexible templates, checklists, forms, and documents for your needs.

Automated Data Collection

An integrated, single source of truth on portfolio performance.

- Improve Data Integrity and limit version control issues
- Spend the budget on strategic activities to scale, not on manually inputting data.
- Make decisions based on 360-degree visibility into your business.

Best-in-Class Workflows and Automation

Digitize workflows and drive efficiency.

- Templates allow for standardized documents and avoid duplicative efforts during document creation.
- Accelerate onboarding and deal velocity with automated workflows and checklists.
- Create standard workflows in your organization, eliminating redundant back and forth.

SOC2 Compliant & Enhanced Security

Enhanced security for any sized organization, giving the right access to the right people.

- Granular access control system based on user roles, granting authorized individuals the correct level of access.
- Easily onboard and verify every user with Single sign-on (SSO).
- SOC2 certification means our cloud infrastructure adheres to rigorous security standards, protecting your valuable information.
